

Automation with ORBIS Smart Services and Microsoft Azure Machine Learning

ORBIS AG has many years of experience in optimization and individual customization of information management systems like Microsoft Dynamics 365 and SAP.

Data are the most important resources for companies in the information age. Machine learning methods are the right tools to extract valuable information out of your data. With Smart Services ORBIS AG is now also offering predictive analytics next to the classic business intelligence solutions.

Highlights of our solutions:

- ◆ Make use of Microsoft Cognitive Services
- ◆ Based on Machine Learning Frameworks like TensorFlow and Microsoft CNTK
- ◆ ORBIS Smart Services offers:
 - ◆ **Smart Sales** – Takes over the classical opportunity scoring, in more detail: the prediction of chances of winning sales opportunities
 - ◆ **Smart Assistant** – Automatically reads e-mails, classifies their content and takes a well defined action inside Microsoft Dynamics 365
 - ◆ **Smart Insights** – Answers individual questions according your business processes
